7+ years of experience in software testing and Quality Assurance which includes manual testing, automation testing, performance testing and mobile testing. Currently working as Senior QA Engineer – Automation at Mobiquity Inc, Pune.

Summary

- Extensive experience in scripted and exploratory testing of mobile and web applications.
- Hands on web automation testing experience using Selenium tool. Good know-how of using open source testing tools and frameworks such as TestNG, Maven, Ant and Jenkins.
- Involved in creation of test automation framework that automated end-to-end testing of any application. Exposure to working with Page Object Model for code maintainability and reusability.
- Used JMeter tool for performance testing of web and mobile systems. Helped in identifying performance requirements and pinpointing performance bottlenecks.
- Worked independently for end-to-end performance testing activities in project. Experience in writing performance test plan.
- Tested native, web and hybrid mobile apps on Android, iOS and Windows Phone platforms. Exposure to Appium as mobile automation tool.
- Worked on web services testing in one of the projects. Taken an initiative of web services automation using JMeter.
- Well versed with Agile testing and hands-on experience dealing with the onsite – offshore model.
- Result oriented with excellent communication, documentation and interpersonal skills. Demonstrated pro-activeness and accountability for producing quality output.
